Getting Started Guide

Full manual and instruction videos available at www.instantpot.com.sg

Welcome to the world of Instant cooking.

Hello! Thank you for welcoming us into your kitchen.

Having families ourselves, we developed the Instant Pot^{TM} DUOTM to allow busy families and professionals alike to cook healthy, delicious meals more easily and in less time.

We have partnered with chefs, authors and bloggers to compile a collection of recipes that we hope you enjoy!

Happy Cooking!

Robert J. Wang

Founder and Chief Innovation Officer

Download Free App:

Initial Set-up

- Remove all packaging material from in and around the cooker, and verify that all parts are accounted for.
- Use only the Instant Pot DUO lid with the Instant Pot DUO cooker base when pressure cooking. Using any other pressure cooking lids may cause damage and/or injury.
- Read all Important Safeguards in the included Safety,
 Maintenance and Warranty booklet before use. Failure to do
 so may result in property damage and/or personal injury.
- Place the cooker on a stable, level surface, away from external heat sources.
- Follow the Care and Cleaning instructions in the included Safety, Maintenance and Warranty booklet to wash the cooker before cooking.
- Do not remove safety warning stickers from lid, serial number from bottom, or rating label from back of cooker base.

A CAUTION

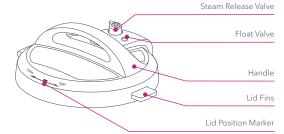

Never use the cooker on a hob. Do not place appliance on or in close proximity to a hot gas or electric burner, or a heated oven; heat from an external source will damage the appliance.

Cooker Base

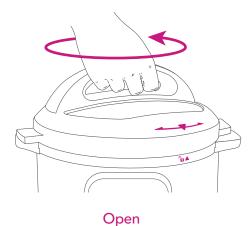

Cooker Parts Overview | 3

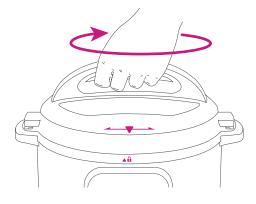

Open and Close Lid

When cooker is plugged in, it will play a jingle when the lid is opened and closed.

Open: Grip handle and turn lid anti-clockwise until ▼ symbol on lid is aligned with ⅙ symbol on rim of cooker base. Lift lid up and off cooker base.

*Note: Always check lid for damage prior to cooking.

Close: Grip handle and align the ▼ symbol on lid with ֏ on rim of cooker base.

Lower lid into track, then turn lid clockwise until ▼ symbol on lid lines up with ♠ indicator on base.

Close

Check Sealing Ring and Sealing Ring Rack

Remove: Pull sealing ring out from behind sealing ring rack.

Inspect sealing ring rack. It should be centred in the lid and an even height all the way around.

Sealing ring must be installed before use.

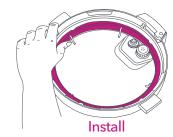

Install: Place sealing ring over sealing ring rack and press into place. Ensure **entire** sealing ring is snug behind sealing ring rack.

After closing the lid, the sealing ring creates an airtight seal between lid and cooker base.

The sealing ring is an integral part of product safety. Replace your sealing ring every 12-18 months or when deformation or damage is noticed.

Remove

Incorrect

A CAUTION

Always check for cuts or deformations in sealing ring prior to cooking. Only use authorised Instant Pot sealing rings. Failure to follow these instructions may cause food to discharge, which may lead to personal injury or property damage.

A CAUTION

Sealing rings may stretch over time. Do not use a stretched or damaged sealing ring. If puckering occurs, replace sealing ring.

6 | Getting Started

Remove and Install Float Valve

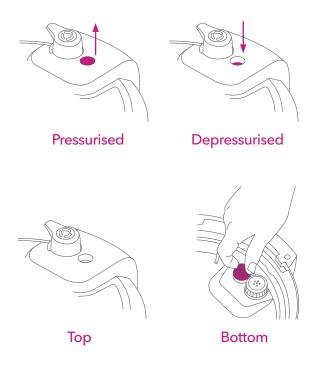

The float valve has 2 positions. It **pops up** to indicate when the cooker is **pressurised**, and **lowers into the lid** when the cooker is **depressurised**.

Refer to "Venting Methods" section in this Guide for information on releasing pressure.

Remove: Place one finger on flat **top** of float valve. Turn lid over. Detach silicone cap from **bottom** side of float valve. Remove float valve from **top** of lid. Do not discard float valve or silicone cap.

The float valve and silicone cap must be installed before use to seal in pressurised steam.

Install: Drop float valve into float valve hole on **top** of lid. Place one finger on the flat top of float valve. Turn lid over. Attach silicone cap to **bottom** of float valve.

While float valve is up, contents of cooker are pressurised. Do not touch the float valve while the cooker is pressurised. Do not attempt to remove the lid while the cooker is pressurised.

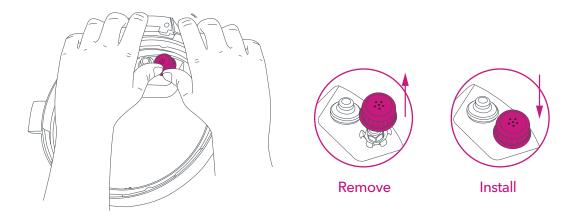

Remove and Install Anti-Block Shield

Remove: Grip lid and press firmly against side of anti-block shield (pressing towards side of lid and up) until it pops off the prongs underneath.

Anti-block shield must be installed before use and cleaned frequently.

Install: Place anti-block shield over prongs and press down until it snaps into position.

Anti-block shield prevents food particles from coming up through the steam release pipe, assisting with pressure regulation.

8 | Getting Started

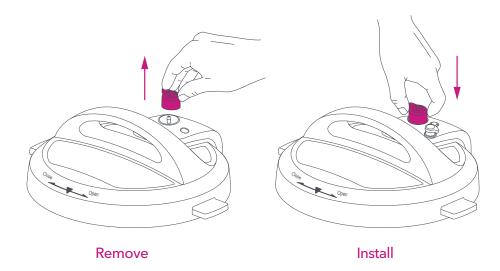

Remove and Install Steam Release Handle

Remove: Pull steam release handle up and off steam release pipe.

Steam release handle must be installed before use and cleaned frequently.

Install: Place steam release handle on steam release pipe and press down. Fits loosely when installed properly, but will remain in place when the lid is turned over.

Remove and Clean Inner Pot

Remove inner pot from cooker base and wash with hot water and washing up liquid before first use.

Wipe outer surfaces of inner pot and heating element to ensure they are dry and free of food debris. Failure to do so may damage the cooker.

Place inner pot into cooker base before cooking. Food must be placed only in the inner pot, not cooker base.

The inner pot is an integral part of product safety. Always use an authorised Instant Pot inner pot made for this model when cooking. Not doing so may cause personal injury or property damage.

To avoid risk of personal injury and/or property damage, do not pour food or liquid into cooker base.

A WARNING

Do not fill the inner pot higher than the **PC MAX — 2/3 line** (Pressure Cooking

Maximum), as indicated on the inner pot.

Exercise extreme caution when cooking and venting food such as stewed apples, cranberries, pearl barley, oatmeal/porridge, split peas, noodles, etc., as these foods may foam, froth or spatter, and may clog the steam release pipe and/or steam release valve. Do not fill the inner pot higher than the — 1/2 line when cooking these foods.

*Note: Always check inner pot for dents or deformations prior to cooking.

10 | Getting Started

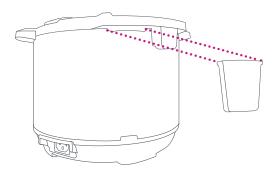

Install Condensation Collector

Install: On back of cooker base, align grooves on condensation collector over tabs and push condensation collector into place.

The condensation collector accumulates excess water and should be installed before cooking. Must be emptied and rinsed after use.

Remove: Pull condensation collector away from cooker base. Do not pull down on condensation collector.

Venting Methods

Venting Methods

Once cooking is complete, there are 2 methods to release pressure:

Natural Release (NR)

Leave the steam release handle in the **Sealing** position. The cooker dissipates heat so pressure releases naturally over time.

This method must be used when cooking food such as soups, stews or chilis, as well as food that expands, such as beans and grains.

Note: Depressurisation time will vary based on volume of food and liquid. May take 10-40 minutes or longer.

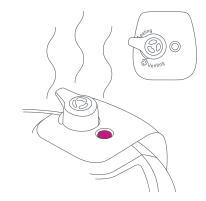

Quick Release (QR)

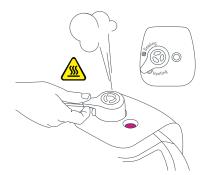

Quickly and carefully turn the steam release handle from **Sealing** to **Venting**.

A continuous stream of steam will release through the top of the steam release handle until the float valve drops into the lid.

Note: It will be loud!

If spatter occurs, move the steam release handle back to **Sealing** and try again after a few minutes. If spatter continues, use NR to vent remaining pressure.

Float valve will drop when cooker has depressurised. Do not attempt to open the lid while the float valve is still popped up.

▲ WARNING				
	Do not place unprotected skin			
the steam release handle.	over the steam release handle.	release handle.		

Venting Methods | 13

Initial Test Run (Water Test)

- Remove inner pot from cooker base and add 3 cups (~750 ml) water to inner pot.
- 2. Insert inner pot into cooker base.
- Secure power lead to base connection socket. Ensure connection is tight. Connect power lead to a 220~240 V power source. Display indicates OFF.
- Align ▼ on lid with ħ ▲ on cooker base.
 Lower lid into track, then turn lid clockwise until jingle sounds.
- 5. Turn steam release handle to **Sealing** position.
- 6. Select Smart Programme: Pressure Cook.
- 7. Use the -/+ keys to adjust cooking time to "00:05" minutes.

Note: The Instant Pot will save any customisation made to cooking time. After 10 seconds, cooker displays **On** to indicate that it has begun **Pre-heating**.

- Float valve rises when cooker is pressurised.
 Once pressurised, Cooking begins and display changes from On to cooking time countdown.
- 9. When the Smart Programme is completed, cooker begins **Keep Warm** or display indicates **End**.
- Turn steam release handle to Venting position.
 Steam will release through top of steam release handle.
 Float valve will drop when pressure has been fully released.
- 11. To open, turn the lid anti-clockwise until a jingle sounds.
- 12. Discard water and dry inner pot.
- 13. Start cooking!

For details on Smart Programmes and operating instructions, view the full manual at www.instantpot.com.sg

14 | Initial Test Run (Water Test

More Controls

Cancel Press to stop a Smart Programme at any time. Cooker returns to Stand-

by and display indicates OFF.

Delay Start Postpone cooking for up to 24 hours. Select a Smart Programme

and, if desired, adjust the cooking time, then press **Delay Start** to turn the setting on. Use the **-/+** keys to adjust the number of hours

before cooking will begin.

Keep Warm Setting turns on by default after cooking is completed on all Smart

Programmes except Sauté and Yogurt. Once Smart Programme is

selected, press Keep Warm to turn the setting off.

Sound On When in Standby, press and hold + key until display indicates S On.

Sound Off When in Standby, press and hold - key until display indicates SOFF.

Note: Error code alerts cannot be silenced.

More Controls | 15

Smart Programmes

Smart Programme	Setting	Suggested Use	Note:	
Soup/Broth	Less	Soup without meat	Liquid remains clear due to lack of boiling motion. Always use NR to release pressure when cooking soup with a high starch content.	
	Normal	Soup with meat		
	More	Rich bone broth	7. Ways ase Till to Tollage pressure when cooking soup with a high stately content.	
Meat/Stew	Less	Soft texture	Choose setting based on meat texture desired, or adjust cooking time manually.	
	Normal	Very soft texture	Allow meat to "rest" for 5-30 minutes, depending on size. It will retain cooking juices for tender, succulent meat.	
	More	Fall-off-the-bone texture		
Bean/ Chili	Less	Firmer texture	Choose setting based on desired bean texture, or adjust cooking time manually.	
	Normal	Soft texture	When cooking beans or legumes, always use NR to release pressure. Ensure dry beans are completely submerged in water.	
	More	Very soft texture		
Poultry*	Less	Soft texture	Choose setting based on poultry texture desired or adjust cooking time manually.	
	More	Very soft texture	Allow meat to "rest" for 5-30 minutes, depending on size. It will retain cooking juices for tender, succulent meat.	
	Normal	Fall-off-the-bone texture	*5.7 and 7.6 Litre only - Mini use Pressure Cook .	
	Less	Tender but firm to bite	For cooking medium and long-grain white rice. Depending on the volume of rice, cooking time may range from 8-15 minutes. Use 10-Minute Natural Release after cooking for perfect results.	
Rice	Normal	Normal texture white rice		
	More	Softer texture white rice		
Multigrain*	Less	Brown rice, wild rice, black beans, chickpeas, etc.	Select Less or Normal " based on type of grain and desired texture. More begins with 45 minutes of warm water soaking time prior to 60 minutes of pressure cooking. *5.7 and 7.6 Litre only - Mini use Pressure Cook .	
	Normal	Brown rice, wild rice, mung beans, etc.		
	More	Tough grains or a mixture of grains and beans		

16 | Smart Programmes

Smart Programme	Setting	Suggested Use	Note:	
Porridge	Less	Oatmeal–coarse or rolled	Adjust time as directed in recipe.	
	Normal	White rice porridge/congee		
	More	Rice porridge/congee with a mixture of various grains	Always use NR to release pressure when cooking foods that expand.	
Steam	Less	Vegetables		
	Normal	Fish and Seafood	Use steam rack provided to raise food above the cooking liquid. Use QR to release pressure and prevent food from overcooking.	
	More	Meat		
Pressure Cook	NA	Manual programming	Press Pressure Level to toggle between High and Low pressure. Use – / + keys to adjust cooking time. Adjust according to recipe for desired results.	
Slow Cook	Less	Corresponds to Low on standard slow cookers		
	Normal	Corresponds to Medium on standard slow cookers	Ensure steam release handle is set to Venting position. Optionally, use a glass lid for slow cooking	
	More	Corresponds to High on standard slow cookers		
	Less	Simmering and reducing	Do not use the lid on Sauté . Maximum 30 minutes to prevent overheating. When display switches from On to Hot , add recipe ingredients. If ingredients are added before Hot message appears, it may not appear at all.	
Sauté	Normal	Pan searing or sautéing		
	More	Stir-frying or browning meat		
Yogurt	Less	For lower temperature fermentation such as for Jiu Niang	Milk must reach a minimum of 72°C for pasteurisation to occur.	
	Normal	Fermenting milk after culture has been added	Allow pasteurised milk to cool to below 43°C. 8 hours is standard for fermentation, but a longer period will result in tangier yogurt.	
	More	Pasteurising milk		

Pressure cooking Smart Programmes operate at **High** (10.2 ~ 11.6 psi) or **Low** (5.8 ~ 7.2 psi) pressure. Higher pressure results in higher temperature.

Smart Programmes | 17
